

## Papers on combinatorial chemistry or solid-phase synthesis from other journals – August 2000

One-pot synthesis of antigen-bearing, lysine-based cluster mannosides using two orthogonal chemoselective ligation reactions. Grandjean, C.; Rommens, C.; Gras-Masse, H.; Melnyk, O. *Angew. Chem., Int. Ed.* (2000), 39(6), 1068-1072.

Intracellular targets of cyclin-dependent kinase inhibitors: identification by affinity chromatography using immobilised inhibitors. Knockaert, M.; Gray, N.; Damiens, E.; Chang, Y-T.; Grellier, P.; Grant, K.; Fergusson, D.; Mottram, J.; Soete, M.; Dubremetz, J-F.; Le Roch, K.; Doerig, C.; Schultz, P.G.; Meijer, L. *Chem. Biol.* (2000), 7(6), 411-422.

Simulated molecular evolution in a full combinatorial library. Illgen, K.; Enderle, T.; Broger, C.; Weber, L. *Chem. Biol.* (2000), 7(6), 433-441.

Boronate linker for 'traceless' solid-phase synthesis. Pourbaix, C.; Carreaux, F.; Carboni, B.; Deleuze, H. *JCS Chem. Commun.* (2000), (14), 1275-1276.

Solid phase lipid synthesis (SPLS) for construction of an artificial glycolipid library. Hamachi, I.; Kiyonaka, S.; Shinkai, S. *JCS Chem. Commun.* (2000), (14), 1281-1282.

Perkin 1 Abstracts: Solid phase organic synthesis. Christopher, J.; McCusker, C.; McKerlie, F.; Wildman, T.; Tierney, J.; Wathey, B. *JCS Perkin 1* (2000), (13), vii-xiii.

Synthesis and application of sialic acid-containing building blocks for glycopeptide libraries. Establishing glycosylation conditions. Halkes, K.M.; St. Hilaire, P.M.; Jansson, A.M.; Gotfredsen, C.H.; Meldal, M. *JCS Perkin 1* (2000), (13), 2127-2133.

Recent advances in the preparation of heterocycles on solid support: a review of the literature. Franzen, R.G. *J. Comb. Chem.* (2000), 2(3), 195-214.

Combinatorial de novo synthesis of catalysts: how much of a hit-structure is needed for activity? Berkessel, A.; Riedl, R. *J. Comb. Chem.* (2000), 2(3), 215-219.

Application of base cleavable safety catch linkers to solid phase library production. Wade, W.S.; Yang, F.; Sowin, T.J. *J. Comb. Chem.* (2000), 2(3), 266-275.

Solid-phase organic chemistry: synthesis of 2 $\beta$ -(Heterocyclylthiomethyl)penam derivatives on solid support. Delpiccolo, C.M.L.; Mata, E.G. *Molecules* (2000), 5(3), 537-538.

Facile solid phase synthesis of YEE(ah-GalNAc)<sub>3</sub>, a ligand with known high affinity for the asialoglycoprotein receptor. Jiaang, W-T.; Tseng, P-H.; Chen, S-T. *Synlett* (2000), (6), 797-800.

A convenient synthesis of the orthogonally-protected benzodiazepine-2,5-dione scaffold.  
Kazmierski, W.M.; McDermed, J.D. *Synth. Commun.* (2000), 30(14), 2629-2634.
